DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-14 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-2, 5, and 7-9 of U.S. Patent No. 6,404,541.

Although the conflicting claims are not identical, they are not patentably distinct from each other. '541 claims a system having a loop of active fiber connected to two ports of a four port coupler, a pump means for injecting pump energy into the fiber, and a wavelength selective reflector coupled to at least a third port of the coupler and reflecting a first portion back into the loop while transmitting a second portion. While this does not provide for all of the limitations of claim 1 of the present invention (i.e. a plurality of wavelength selective reflectors), this claimed embodiment is generic to the claims of the present invention. Since all claims of the present invention include the limitations of this claimed embodiment, then any patent granted on the present invention would provide for an improper timewise extension of the right to exclude provided for in '541.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Each reference shows a system having a fiber loop.
